

ECHO Ontario Addiction Medicine and Psychosocial Interventions

ECHO is a virtual, interactive education and capacity building model that supports healthcare providers in delivering high quality, evidence-based mental health and addictions care in their local communities.

Do people in your clinical practice use substances?
Do they have different goals about their substance use than you do?
Would you like to create a clinical environment where you can offer screening, assessment AND treatment for substance use?

ECHO Addictions Medicine and Psychosocial Interventions (AMPI) aims to help healthcare providers build capacity in the treatment and management of addictions.

Schedule

Starting April 27
Mondays 2-4 pm
8 weeks
